

WEILL CORNELL GRADUATE SCHOOL FELLOWSHIP AWARD POLICY

This document defines Weill Cornell Graduate School (WCGS) policies for the Fellowship Award.

While WCGS guarantees funding for all students, we strongly encourage our students to apply for external funding. Having a fellowship during graduate study will make a student more competitive when applying for positions after graduation. As an incentive, WCGS issues an annual cash award, officially called the Fellowship Award, to each student who receives a fellowship, scholarship, or grant from an external funding agency's competitive award program.

Eligibility:

- Only individual competitive fellowships, scholarships, or research grants from external agencies are eligible for a Fellowship Award. Institutional training grant (T32) appointments or Diversity Supplements trainees are ineligible.
- Such fellowships, scholarships, or grants need to provide funds in at least one of the following categories: stipend, tuition, or student fees. If fellowships, scholarships, or grants only provide lab supplies and/or travel, they are ineligible.

Amount:

- Eligible students receive 10% of the annual total funding, up to \$3,000 per year. A recipient continues receiving the Fellowship Award as long as the fellowship, grant, or scholarship is active.

Distribution:

- WCGS issues the Fellowship Award twice a year. Students who activate eligible fellowships, grants or scholarships, or start a new year of an existing award between November and May, receive their Fellowship Award checks in June. Students who activate new fellowships, grants, or scholarships, or start a new year of such between June and October, receive their Fellowship Award checks in November.
- The cash bonus comes in the form of check as a "prize." It is not considered compensation; it doesn't appear on the W-2 form or 1099-misc and is not reported to the IRS.

The Graduate School reserves the right to determine the eligibility of a fellowship, scholarship, or grant for the Fellowship Award.
