Graduate Program in Neuroscience
Student Handbook

**Graduate Program Personnel**
Program Chair is Dr. M. Elizabeth Ross
e-mail: mer2005@med.cornell.edu

Program Director is Dr. Giovanni Manfredi
e-mail: gim2004@med.cornell.edu

Program Coordinator/Manager is Ms. Veronica Bohorquez
e-mail: veb2012@med.cornell.edu

**Individualized Flexible Program**
Neuroscience by its very nature is a multi-disciplinary field, and our students therefore explore their varied research interests through a combination of activities in the lab and in classroom, as well as personal study. The curriculum is flexible and is developed by each student through consultation with the Director and with her/his Advisor to include basic coursework and lab rotations completed during the first 2 years, followed by an Admission to Candidacy Exam (the ACE), and then completion of a thesis.

**Courses**
Each student must complete 6 required courses and at least 2 electives that complement each student’s areas of interest by June 30th of their second year.

**Mandatory Courses in Neuroscience:**

1st Year Fall
- From Neuron to Brain: An Introduction to Neuroscience (Q1-3)
- Next Generation Methods (Q 1-2)
- Neuroscience Faculty and their Research (Q1-3)
- Progress in Neuroscience (Q1-4)

1st Year Spring
- Molecular Neuropharmacology (Q3)
- Neuropeptides, Pain & Drugs of Abuse (Q4)
- Responsible Conduct of Research: A Tri-Institutional Program for Research Trainees (Spring 2018, sometimes held by Memorial Sloan Kettering) **Mandatory Graduate School Requirement**

2nd Year Fall
- Quantitative Understanding in Biology (Q1) *

* Mandatory requirement to take 1st Quarter of 2nd Year.
Examples of Elective Courses in Neuroscience:
*Addiction and Society (Q3-4)*
*Current Topics in Neurodegeneration (Q3-Q4)*
*Mathematical Structures in Neuroscience (Will be offered in 2018-2019)*
*Developmental Neurobiology (Rockefeller University- varied years)*

Other Elective Courses in the Graduate School:
*Introduction to Pharmacology (Q 1,2)*
*Molecular Genetics (Q 1,2)*
*Biochemistry and Structural Bio Core (Q 1,2)*
*Principles of Developmental Biology (Q1)*

Please also view the 2017-2018 course catalog for alternative course offerings

**LABORATORY ROTATIONS & EXPECTATIONS**

1. All students must complete 3 lab rotations during the first two years *(No later than December of their 2nd year in the most extreme circumstances).* The student will choose a Thesis mentor based on the lab rotation experience and acceptance by the faculty member directing the lab.
2. Laboratory rotations last 2-3 months each, the average student spends between 10-14 weeks rotating in a lab. The minimum is 8 weeks, the maximum is 16 weeks. 3 months is recommended.
3. Students are expected to begin their laboratory rotations no later than November of their 1st year. If you will be starting past November, you must notify Neuroscience Program Leadership.
4. Please consider your lab rotations carefully, each student must complete 3 laboratory rotations and by their 3rd they are aware of their thesis lab. If a student has not found a thesis lab, a 4th lab rotation is encouraged. **By the beginning of September, students are expected to have a thesis lab, complete 2nd year course work, and begin research on ACE.**
5. Laboratory Rotations can be done with Neuroscience Graduate faculty members and/or labs from other programs in the graduate school (i.e. Immunology, BCMB, etc.) or at Memorial Sloan Kettering; as long as the student’s research is tied to Neuroscience. If you have questions about rotating with faculty or becoming part of a lab that does not have a Neuroscience appointment, please consult with the program director.

Students should decide on laboratory rotations by discussing opportunities with individual faculty members. Rotations allow students to get hands-on experience with experimental approaches that interest them and provide an opportunity for students to get to know faculty with whom they may wish to do their thesis work. Most importantly, they provide an opportunity to learn how to design controlled experiments, evaluate data, present their data to scientific colleagues, and make new discoveries!
**Recruitment**

To enhance the state of the Graduate Program, 1st, 2nd, and 3rd years are expected to participate in recruitment days (January & February of each year). Students will be paired with prospective candidates as an opportunity to help promote the program.

**Recruitment Dates:**
- Weds. January 17th – Fri. January 19th
- Weds. February 7th – Fri. February 9th

Additionally, all forms and handbooks are accessible via the Graduate School website. It can be located: http://gradschool.weill.cornell.edu/student-experience/student-forms

**Retreat**

Students are expected to attend the annual Neuroscience Retreat which is held in March. It is a significant part of the Neuroscience community in which faculty and students interact formally and informally to discuss progress and updates. Years 1-6 all are expected to participate through varied forms of activities including giving talks, presenting posters, partaking in a faculty roast and more.

**Retreat 2018 Date:** Friday, March 9th – Sunday, March 11th
Ocean Grove, NJ

**ACE (Qualifying) Exam**

Prior to July 1st of year 2, students must successfully complete the ACE (admission to candidacy examination). The ACE is designed to test the student’s general knowledge of neuroscience and includes preparation of an original written research proposal. In consultation with the thesis advisor and with the consent of the director of the program, the student chooses an ACE topic and committee.

**Guidelines:** The ACE topic MAY deal with the topic of the proposed thesis, but it is not required that the topic of the ACE should eventually be incorporated into the student’s PhD dissertation. No preliminary experimental data are required for the ACE. The written and oral are expected to be grounded in the published literature, not the student’s own data. The topic may differ from the thesis in model system, methodology or question. The student can meet with the committee about the proposed topic and the thesis advisor can give general feedback on the appropriateness of the aims and design. The format follows the instructions to the individual NRSA NIH graduate fellowship application, except that no experimental pilot data are required or expected in the ACE.

**The committee should consist of at least 4 examiners, 3 of who must be on the neuroscience graduate faculty.** These members will include a designated neuroscience faculty member to serve as chair of the committee, the student’s thesis advisor and two other faculty members.
The written ACE should be submitted to the graduate school and program manager 2 weeks before the oral defense of the ACE. The format of the ACE should be the new NRSA format, with a complete abstract for the proposal, a 1 page specific aims and 6-page research plan and separate pages for references. Please be sure to read and cite empirical studies rather than reviews. Please reference the “ACE Checklist” form for further information on formatting and your committee.

ACE Exam must be completed no later than June 30th of 2nd year.

Vacation Policy
Any time off while in the lab has to be discussed and approved by the PI. This absence is applicable whether you are on a rotation or with your thesis mentor.

News and Events
Make sure to be updated with events at Cornell. There are monthly seminars, workshops, and networking events held at the graduate school. For more information please visit http://gradschool.weill.cornell.edu/about-us/news-and-events

The BIG D (Dissertation)

After successful completion of coursework and the ACE, the student should form a special committee to oversee their thesis that consists of a designated neuroscience faculty member to serve as chair of the committee, the student’s thesis advisor and two other graduate faculty members. This special committee must meet at least once a year to provide advice concerning the direction of the thesis. Upon completion of the thesis, the student will prepare the work for publication, present it to the University in an open seminar, and defend the validity of the work before the committee and the members of the Program.

Forms and more information are available from the Graduate School and can be found at this link: https://nexus.med.cornell.edu/display/gradschool.

Program & Graduate school Activities

Graduate students are encouraged and expected to participate in Program and Graduate school activities, including the annual retreat (mandatory), recruitment, Vincent du Vigneaud Research Symposium and other neuroscience activities posted by the Program.

If a student is interested in traveling to a conference, she/he must be presenting a poster and first submit a travel request form to the graduate school. The student pays for costs up front, and is reimbursed up to $800 per year.
